

Health Related Majors

Recent Majors

Students have designed health-themed individualized majors through the College of Liberal Arts and Sciences (BA or BS) and the College of Agriculture, Health and Natural Resources (BS). Recent titles include:

Health and Social Inequality	Global Health
Health in the Latino Community	Community Health and Wellness
The Black Experience and Health	Exercise Physiology and Health

Required Courses

Your individualized major plan of study will consist of at least 36 credits of 2000-level or higher courses, 18 of which must be from the college granting your degree, and must include the following:

Research Methods Course

A research methods course will introduce you to how knowledge is produced and evaluated in a particular discipline. Choose one from an academic department that is integral to your major. Some examples include: PSYC 2100WQ, SOCI 3201, ANTH 3004, or HDFS 2004W.

Capstone

UNIV 4600W Capstone Course, UNIV 4697W Senior Thesis, or an approved alternative.

Writing Intensive Course

A writing intensive course that is relevant to the major theme. This will normally be designated “W” in the course catalog and is *in addition to* the capstone.

We strongly recommend that you include an **experiential learning** component, such as an *internship*, *research*, or *study abroad*, in your plan of study.

Bachelor of Science in CLAS

If you intend to complete a BS in your individualized major through the College of Liberal Arts and Sciences, you must include 24 credits of science in your individualized major plan of study *and* fulfill the CLAS general education requirements for the BS degree. (Note: if your IMJR is your *second* major and your primary major is in a science field, then you do not have to have 24 science credits in your IMJR.)

Prerequisites

Check the catalog for any prerequisites for the courses you wish to include in your plan of study. Upper-level courses in communication, economics, psychology, statistics, and the sciences all have prerequisites.

PUBH 1001 Introduction to Public Health serves as an excellent foundation for a major focused on public or community health.

Frequently Included Courses

Please note that this is **not** a complete list; you may find other relevant courses in the catalog. Please check Student Admin and consult with your faculty advisors to be sure that the courses you would like to include in your major will be taught in the upcoming semesters.

Important Note! Almost all courses in **Allied Health, PNB, MCB, and Organic Chemistry** are relevant to health; they are not listed individually below. Most **HCMI** courses are also relevant to health, but please see the IMJR Guidelines on Inclusion of School of Business Courses.

ANTH

3004 Cultural Research
3202W Illness and Curing
3251 Psychological Anthropology
3300 Medical Anthropology
3302 Medical Ecology
3320 Race, Culture, and Reproductive Health
3325 Intro to Global Health
3326 Global Health and Human Rights
3327 Power and Health in Latin America and the Caribbean

COMM

3420 Health Communication

ECON

2451 Economic Behavior and Health Policy
3451 Health Economics
3453 Economics of Global Health

GEOG

3240 Health Geography

HDFS

2004W Research Methods in HDFS
2100 Human Dev: Infancy through Adolescence
2200 Human Dev: Adulthood and Aging
